BCA

### PROFILE

---

Software engineer with a demonstrated history of working in a deep tech startup based in Bangalore. My skills include proficiency in React, Next.js, and Three.js, as well as graphic designing. I hold a Master of Computer Application from Jain University, Bangalore, Karnataka, providing me with a solid background in computer science

### EXPERIENCE

---

#### Software Engineer, AIOTEL, Bengaluru

July 2022 - Present

- Developed front-end web applications with HTML, CSS, Next.js, and React.
- Enhanced responsiveness of web pages by optimizing media screens using CSS.
- Integrated REST API on the front-end and utilized Django REST framework.
- Developed cross-platform mobile application using React native.
- Collaborated on designing UI for web applications using Figma.
- Led a team on web application projects.
- Worked with various 3D geometry formats (glTF, 3D Tiles, IFC)

#### Graphic Designer, Dax Ads, Kannur

April 2021 - September 2021

- Designed posters and logos using Adobe Photoshop.
- Performed image color correction tasks using Adobe Lightroom.

### PROJECTS

---

#### Online Voting System

**Objective:** Online voting system aims on streamlining decision-making processes within the group. I Handled the complete front-end development process from end to end.

**Tools:** HTML, CSS, JavaScript, Flask, MongoDB

#### Plant Care App

**Objective:** A Cross-Platform mobile application to manage plant care, ensuring users receive timely notifications for maintenance tasks.

**Tools:** React Native
